MATLAB Themes
This tutorial shows you how to change color schemes for MATLAB and Slack

1. Go to: https://www.mathworks.com/matlabcentral/fileexchange/53862-matlab-schemer
   a. This should take you to the MathWork File Exchange
2. Download MATLAB Schemer
   a. You will need to sign into you MathWorks Account in order to do so.
3. Extract the file
   a. Find the file wherever your downloads are stored
4. Open schemer_import.m in MATLAB
5. Run the Code with no inputs
   a. Remember the file location must be in your active directory
   b. Either go to the EDITOR tab and click Run or enter schemer_import in the command window
   c. This will open a Select File to Open window
6. Select the schemes folder
7. Select any one of the .prf file (I prefer dark steel usually, but if its Friday and I want to swallow the blue pill, I go Matrix)

Other features of the code:
- You can export a scheme you make using schemer_export.m
- There are screen shots of all the schemes under schemes => screenshots

Try out all the schemes and pick your favorite!

Work Hard Slack Theme
Get the Work Hard Theme on Slack so your professor knows you are working hard!

1. From the desktop version of Slack, click the workspace name (where is says CURENT ERC in the upper left)
2. Select Preferences
3. Select the Sidebar tab and scroll down
4. Select Work Hard as your Slack theme because you work hard every day.
5. Take the rest of the day off. You deserve it. You've worked hard.

Additional instructions for changing themes in Slack:
